

Enhancing beautiful design using the art of light.

Lighting Changes our Environment

At MAG-Lighting Design (MLD) we use a variety of computational stimulation and production tools to quickly evaluate the design process and present its effects to the client.

The firm is dedicated to provide each project with optimal levels of quality, ambiance, control and functionality. MLD believes that solid lighting design should be performed with careful attention to the environment.

The practice actively applies the advanced requirements of the latest energy codes and sustainable lighting design standards. This ensures optimization of visual performance and energy efficiency. Through a thorough analysis of each case, the team offers functional, yet unique, designs, frequently resulting in repeat business.

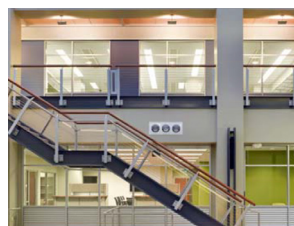

MAG-Lighting Design, LLC provides creative lighting design, energy, daylight and LEED analysis.

Our team is ready to assist you in your ultimate goal - lighting design that enhances the beauty and performance of your architectural interiors and exteriors.

Our goal is to help you realize your expectations, define them and develop solutions. We are excited about the opportunity to work with you!

Maggie DiDomenico

MAG Lighting Design's portfolio includes higher education, health care, cultural centers, hospitality, commercial interiors and housing projects.
